Women in Energy Open Source Mentorship Programme

Subject: Application for Women in Energy Open Source Mentorship Programme (Spring 2027)

Dear Selection Committee,

I am writing to express my interest in the Women in Energy Open Source Mentorship Programme. I came across this opportunity while exploring mentorship programs that focus on open-source technologies and professional development. The program's mission of empowering women through collaboration and open-source innovation strongly resonates with my career aspirations.

I am currently a **final-year Computer Science and Engineering student** at Saveetha Engineering College with a strong interest in Python, Artificial Intelligence, Machine Learning, Data Science, and Full-Stack Development. Through internships in Web Development and Ethical Hacking, along with hands-on AI projects, I have developed practical programming, analytical, and problem-solving skills. I enjoy learning new technologies and applying them to solve real-world problems.

Although I am new to the energy domain, I am eager to learn how open-source technologies can be used to address global energy and sustainability challenges. I believe my strong programming foundation, curiosity, and commitment to continuous learning will enable me to contribute effectively to the program.

Through this mentorship, I hope to gain guidance from experienced professionals, improve my technical and collaborative skills, contribute to open-source projects, and build a deeper understanding of energy modeling. I also look forward to connecting with a diverse community of women in technology and learning from their experiences.

Thank you for considering my application. I would be grateful for the opportunity to participate in this mentorship program and contribute with dedication, enthusiasm, and a willingness to learn.

Sincerely,

Jayasree R
